

# evolve®

**Evolve®** is the industry's newest redemption system that utilizes **printed coupons in place of traditional paper tickets or costly E-ticket systems.**

Bay Tek's Evolve boxes can be mounted on any ticket redemption game. Each box plugs into the existing ticket dispenser cables and requires no extra connections, making it user-friendly.

Players receive printed tickets, which include the ticket value and a QR code. These tickets are collected and redeemed at Bay Tek's Prize Hub.

The QR code is a secure and fool-proof data transfer system. The Evolve system's QR codes can be uniquely coded to individual Prize Hubs. They cannot be altered or scanned more than once, and they have built-in error correction that allows them to scan with ease...

**even when crumpled.**

## *Evolve into the next generation of redemption!*

Dimensions: 6"W x 5"D x 10"H
